An Introduction to your –

AMSTRAD P.C.

A users guide to the installation and operation of the AMSTRAD PC 1512

The simplest way to start getting a return on your investment in an Amstrad P.C. In just a few minutes you can see how to get your new Amstrad going and doing useful work. Peter Reynolds takes you from plugging the separate units of your system together to a basic understanding of the Gem Graphics Interface, the MS-DOS operating system and some common applications software. Throughout the programme, the emphasis is on demonstrating exactly how to get results from your computer.

CONTENTS

■ INSTALLING YOUR AMSTRAD PC ■ STARTING GEM
■ THE GEM GRAPHICS INTERFACE ■ MS-DOS
■ WORD PROCESSING ■ SPREADSHEETS ■ DATABASES
■ COMMUNICATIONS & MODEMS ■ PRINTERS
■ HARD DISK SYSTEMS ■ WHERE TO GO FROM HERE

"No more gobbledegook! Now you can actually SEE how to make a computer do useful work."

Peter Reynolds is a video producer, computer enthusiast, writer and springer spaniel owner. He has written and produced many programmes and commercials for computer companies ranging from Olivetti business computers to US Gold computer games. He presents CTV (Computer Trade Video) in conjunction with Guy Kewney and produces most of the computer games videos that you see on show in high street stores.

Throughout the programme the elapsed time is shown in minutes and seconds in the corner of the screen. Using the high speed search facility on a standard VCR and the enclosed index, separate sections of the video may be accessed quickly and easily.

VHS 85 mins
